

## What Families Need to Know for Summer and the 22/23 School Year

### *Summer 2022*

- All students in DPS were provided with a Lenovo Chromebook and a charger for use in the 21/22 school year.
- Students will **keep** their district Chromebooks over the summer so they can continue to learn and access resources outside of the classroom.
  - If your student is graduating, transferring to a Charter school, or leaving the district altogether, the district Chromebook must be returned to the school. If a Chromebook is not returned, you will incur a \$280 replacement fee.
- Students may need to use their district Chromebook for Summer Connections and other learning opportunities available to them.

### *22/23 School Year*

- If your student was in a DPS school the previous year, they should have taken their district Chromebook with them over the summer. If they need a replacement device, they can contact their School Technology Partner/ Representative.
- Students in grades 2nd - 12th will take their district Chromebooks home with them each day to continue their engagement and learning outside of the classroom.
- If your student needs reliable access to the Internet, they can request a hotspot from their school.
  - Comcast also provides free home Internet for qualifying families.
- When registering your student, be sure to review the Device Agreement (linked below and included in the registration packet) carefully so you understand the responsibilities in having access to a district Chromebook.

For any issues with your student's Chromebook **during the school year**, please contact your school to inform them and they will work to swap out a working Chromebook.

For any issues with your child's Chromebook **during the summer**, please contact the Department of Technology Services (DoTS) Student and Family Tech Support line at 720-423-3136.
